

Hello to all of my Enigma friends for August,

Britain's "Bomber" Harris—now there was a man with some grit! Air Marshal Arthur "Bomber" Harris was perhaps the most intractable (a nice way to say "stubborn") person the world has ever seen. Yet he would pay grudging attention to Enigma decrypt information, even when he was not allowed in on the Enigma secret. Let's see how this played-out in the deadly skies over Europe.

Please use my U-571 codesheets, August 30, 1944, default machine

The Kenngruppen is in play. Start decrypting with "SXUTZ."

Please use "Auto type." See October's Newsletter on how to use it. Saves tons of time!
