

Hello to all of my Enigma World Code Group Friends,

Here is February's Enigma history newsletter—on time and under budget! Let's call it, "By itself, did Enigma make a difference?" The source is Dr. Williamson Murray, a history professor at Ohio State University. One of the features of the article I liked was that Murray put U-boat victories in terms of both ships sunk and tonnage sunk. I don't know about you, but I can't relate to tonnage sunk at all. If some guy says, "There was 202, 820 tons of cargo sunk . . .," I can't grasp how much that is. But if a guy says, "There were 53 ships sunk . . .," that I can understand! I hope you like the history lesson. It was fun to prepare it for you.

Attention all hams: (well, everyone, really!) Please take a look at our Forum section under the heading, "N7E(nigma) Amateur Radio Special Event." Remember, all of these Enigma messages were sent in Morse Code over the radio. Since many of our members and I are radio amateurs, I thought that we could do something special for Enigma, Bletchley Park, and the Enigma World Code Group. So I just thought-up this wacky idea and decided to do it. I'll add details to the Forum posting as I discover what exactly I've volunteered for. Everyone can participate; you don't need to have an amateur radio license or equipment. Just find a radio amateur who is willing to help you. Look for a house with a bunch of weird antennas all over the roof or in the back yard. He's a ham!

This month's quotation will follow in a few days.

Remember: FMDBC is the Kenngruppen. Start decrypting with MQOWE.

Use "Auto Type." Instructions for Auto Type are in October's newsletter.

Use my codesheets, U-571, February 26, 1944
